

HÜSEYİN YURTSEVEN

Senior Engineering Leader | Machine Learning & Personalization

Berlin, Germany | hyurtseven81@gmail.com | +49 174 757 8231

EXECUTIVE SUMMARY

Accomplished engineering executive with 20+ years of software development experience and 10+ years leading high-performance teams at scale. Recognized leader in AI/ML and Data Science organizations, with proven expertise building and scaling cross-functional teams of Applied Scientists, Machine Learning Engineers, and Data Scientists. Track record of delivering measurable business impact through ML-powered personalization, recommendation systems, and data-driven decision-making at companies including Amazon, Alibaba Group, and Delivery Hero.

PROFESSIONAL EXPERIENCE

Amazon / Amazon Music

Senior Software Development Manager, Amazon Music Machine Learning *January 2023 - Present*
/ Berlin, Germany

Lead cross-functional teams of Applied Scientists, Machine Learning Engineers, and Software Development Engineers within Amazon Music Personalization organization.

- Direct leadership of cross-functional teams focused on customer understanding, ranking optimization, and experience orchestration
 - Drive strategic technical initiatives in personalization algorithms, re-ranking systems, and customer behavior modeling
 - Architect scalable ML systems serving millions of Amazon Music customers globally
 - Collaborate with product, science, and engineering leadership on roadmap and technical strategy
-

Trendyol / Alibaba Group

Head of Engineering *December 2021 - January 2023 / Istanbul, Turkey*

Led engineering organization for local commerce vertical, managing 17+ teams across logistics, assortment, and store operations.

- Established organizational structure and team topologies optimizing for autonomy and delivery velocity
- Served on tribe leadership group, shaping company-wide technical strategy
- Partnered with data engineering and data science teams to build data-driven capabilities
- Introduced OKR framework, Executive Action Team, and RFC/ADR processes
- Transformed organization to outcome-driven, empowered team model

Technologies: Python, FastAPI, Golang, React, scikit-learn, TensorFlow, PyTorch, Microservices, MongoDB, PostgreSQL, Elasticsearch, AWS, GCP

Delivery Hero SE

Director, Software Engineering *July 2020 - December 2021 / Berlin, Germany*

Led Q-Commerce engineering tribe, managing managers of managers, senior data science managers, and engineering teams.

- Directed engineering organization including platform teams, data science teams, and product engineering
- Launched comprehensive Product Information Management (PIM) system
- Redesigned team structure resulting in measurable improvements in delivery velocity and quality
- Implemented OKR methodology across tribe, aligning engineering efforts with business outcomes
- Developed multi-criteria ranking solution improving search relevance

Technologies: Python, FastAPI, Golang, React, TensorFlow, PyTorch, Microservices, PostgreSQL, Elastic-search, AWS, GCP

Kariyer.net

Chief Technology Officer *February 2020 - July 2020 / Istanbul, Turkey*

Led technology organization of Turkey's premier job board and ATS platforms, managing 80+ engineers, data scientists, DevOps engineers, and QA professionals.

- Directed all engineering, R&D, DevOps, and QA functions across multiple product lines
- Established software architecture standards and scalability principles for high-traffic platforms
- Implemented OKR and Agile methodologies across engineering organization

Technologies: .NET Core, Python, React, Next.js, Vue.js, scikit-learn, TensorFlow, Microservices, Azure

BluTV

Chief Technology Officer *April 2018 - February 2020 / Istanbul, Turkey*

Led technology vision for Turkey's leading OTT streaming platform, managing 40+ engineers, data scientists, and DevOps professionals.

- Directed end-to-end technology development for OTT platform serving millions of users
- Built in-house capabilities across video delivery, DRM, recommendation systems, and content management
- Developed proprietary streaming infrastructure supporting HLS, MPEG-DASH, and multi-DRM
- Built ML-powered recommendation and personalization systems

Technologies: Python, React, scikit-learn, Microservices, MongoDB, PostgreSQL, HLS, MPEG-DASH, DRM, AWS

Dogan TV

Director of Software Development and Technical Innovation *September 2015 - April 2018 / Istanbul, Turkey*

Led 70+ person engineering organization across multiple media properties and platforms.

- Directed development of headless CMS (Blupoint CMS), eCRM, DRM systems, and custom CDN solutions
- Architected Hadoop-based ML systems for recommendation, churn prediction, and segmentation
- Processed and analyzed clickstream and video event data from 40+ platforms

Platform Portfolio: blutv.com.tr, netd.com, kanald.com.tr, cnnturk.com, dsmart.com.tr

Technologies: Python, Vue.js, scikit-learn, Microservices, MongoDB, Elasticsearch, Hadoop, DRM technologies

PUBLICATIONS

A Unified Recommendation Model for Features Summarization Amazon Science | <https://www.amazon.science/publications/a-unified-recommendation-model-for-features-summarization>

TECHNICAL SKILLS

Leadership: Cross-Functional Team Leadership, Organizational Design, Strategic Planning, OKR Implementation, Agile Methodologies

AI/ML: Machine Learning, Recommendation Systems, Personalization, Ranking Algorithms, Deep Learning, MLOps

Engineering: Distributed Systems, Microservices, Python, Golang, Java, JavaScript/TypeScript, React, Cloud (AWS, GCP, Azure)

Data: PostgreSQL, MongoDB, Elasticsearch, Redis, Data Pipeline Architecture

EDUCATION

Bachelor of Science in Physics | Istanbul University | 2000 - 2005

CERTIFICATIONS & TRAINING

- AWS Solution Architect (2018)
 - Deep Learning (2018)
 - Kubernetes (2017)
 - Machine Learning (2013)
 - Project Management and PMP Preparation (2012)
-

ADDITIONAL INFORMATION

Languages: Turkish (Native), English (Fluent) **Location:** Berlin, Germany **Work Authorization:** Permanent Residency
